SUMMARY

Full-Stack Engineer specializing in scalable backend systems, real-time data pipelines, and high-load production environments. Experienced in building distributed data synchronization pipelines, optimizing backend performance, as well as delivering fullstack applications.

PROFESSIONAL EXPERIENCE

LACAK.IO

Tangerang, Banten

Fullstack Engineer

MARCH 2025 - Present

- Built and maintained **Spring Boot, Go, and PHP** services for high-load, data-intensive production systems.
- Designed and implemented **bidirectional real-time CDC pipelines** across **Salesforce, PostgreSQL, MariaDB, and Elasticsearch**.
- Improved a legacy PHP subsystem operating under **million-scale internal DB operations per second**, achieving a **37,500% speedup** on a critical query (2 minutes → 300 ms).
- Built ETL and data-sync workflows using **Meltano** and **Dagster**.

BINUS SOFTWARE LABORATORY CENTER

Kemanggisan, Jakarta Barat

Research and Development Staff

FEBRUARY 2024 - FEBRUARY 2025

- Maintained web infrastructure built using the .NET stack, Next.JS, Angular.JS and React.JS serving **3500 DAU** and up to **1000 concurrent users** spread across 5 campuses in Greater Jakarta, Malang, and Bandung.
- Developed new features, resolved production issues, and collaborated with multiple divisions.
- Containerized application** and **pioneered CI/CD pipelines** for automatic build and deployment..
- Built **monitoring** and **alerting systems** to improve system visibility and uptime.

Software Laboratory Assistant

FEBRUARY 2023 - FEBRUARY 2024

- Taught and supported programming and computer science subjects for undergraduate students.
- Awarded **Best Performing Assistant** for exceptional contribution and teaching performance.
- Recognized as **Best Qualified Assistant** for being eligible to teach the highest number of subjects.

EDUCATION

BINUS UNIVERSITY

Kemanggisan, Jakarta Barat

Bachelor of Computer Science, GPA: 3.86

2022-2026

SKILLS

Languages: Go, Java, PHP, Javascript, TypeScript, Python, C#

Backend: Spring Boot, Laravel, .NET, NestJS, Go

Frontend: React, Next.js, Svelte

Data Engineering / Streaming: Kafka, Debezium, RisingWave

DevOps & Infrastructure: Docker, Linux, GitHub Actions, Jenkins, CI/CD, Dagster

ACHIEVEMENTS

Diploma of Best Performing Assistant: Recognized as having one of the best performance and contributions as a Software Laboratory Assistant.

1st Place Codefest Hackathon 2.0: Designed a hiring platform in a decentralized environment using blockchain.

Continuous Innovation Award 2024: Developed an integrated platform that connects the Kemanggisan community through gamification.
